EYELASH EXTENSIONS

The Eyelash Extensions procedure is semi-permanent procedure to add length and volume by the use of extensions to your own natural lashes. Each strand of hair is attached to the base of your natural lash to create a longer and thicker extension to your own lashes. The extension is not attached to the skin in any way – only to the actual hair.

This procedure is a relaxing process that will take up to 90 minutes. Lashes are now cleansed, removing any makeup or residue, and primed with a silk protein treatment to strengthen natural lashes and help prevent eyelash breakage. Your eyes will remain closed as your professional Extensionist preps your eyes for the procedure with a cooling under eye gel pad. The gel pads help to reduce fine lines and wrinkles. It also leaves eye zone moisturized and soft. The clients eyes remain closed during the duration of the procedure. Your professionally trained Extensionist will take the necessary safety precautions to make sure your eyes are comfortable and safely protected from the adhesive and/or tweezers. You will remain in reclined position for the duration of the procedure. Your eyes will remain closed during the entire procedure. Application now begins.

EYEBROWS

Achieve a fuller more defined eyebrow. Eyebrow tint darkens or lightens the natural eyebrow color to create a more natural brow. Eyebrow pencil/powder is not needed for this application.

\$25 - Eyebrow Tinting – (Lasting up to one month)

Beautifully shaped eyebrows with a nice arch are an important part of a polished look. When done well, eyebrow shaping calls attention to your eyes, frames them, and makes them appear more open.

\$20 – Eyebrow wax and contour (wax and brow fill-in with powder, brow pencil and gel sealer)

\$10 – Eyebrow wax (waxing to achieve a fuller more natural looking brow)
